DK Eyewitness Books: Fossil

Machaut's Messe de Notre Dame stands as an enduring monument of medieval musical art. As such it is one of the most widely studied and performed works of music written before 1600. The Mass itself, however, is surrounded by uncertainty; its date of composition is unknown, its purpose is unclear, and its construction yields much ambiguity. Daniel Leech-Wilkinson has now prepared a much-needed modern performing edition of this work, published by OUP's music department. This companion volume defines his editorial methods in the context of the minefield of controversies surrounding the principles of editing music of this period, and indeed of the many different interpretations of the compositional structure and function of the music. Relating the Mass to other works of the period, he provides the student and performer with an invaluable guide to its intricacies,

"Magnificent in its breadth and illustration." -- Booklist Dinosaurus was published in 2003 and went on to sell 15,000 in hardcover and more in paperback. Now 13 years have passed during which there have been dozens of discoveries. At the same price and fully revised, this edition of Dinosaurus is simply too exceptional a value to pass up. Many incredible discoveries made 2015 a banner year. For example: Yi qi ("ee chee," "strange wing"), the earliest known flying non-avian dinosaur The "Chicken from Hell," a bird-like beaked, clawed and feathered dinosaur that roamed the Dakotas Zhenyuanlong suni, a cousin of Velociraptor, suggests that this family has been inaccurately

depicted. The new 5-foot-long dino more resembles a feathered poodle than the brute of Jurassic Park. "Superduck," at 5 tons and with a mate-attracting head crest it is thought to be a missing link between two other known duck-billed head-crested dinosaur species. Perhaps most exciting is that in 2016 the American Museum of Natural History opened a new exhibition featuring the astonishing, newly discovered 122-foot-long titanosaur, yet to be named. The plant-eating colossus is the largest dinosaur ever found -- it weighed around 77 tons--as much as 14 or 15 African elephants! No other life-form captures the imagination like dinosaurs. Organized by the major dinosaur families, *Dinosaurus* identifies 500 species. It describes in detail and stunning illustrations what they looked like, what they ate and how they fought, lived and died. The features include: Concise explanations of species' traits and habits Vivid full-color illustrations representing life among the dinosaurs Stunning color photographs of dinosaur discoveries Latin name, translation and pronunciation Height specifics and comparison to humans Diet and habitat Global distribution. Brimming with research from digs in North America, Mongolia, Europe, China and elsewhere, *Dinosaurus* is an encyclopedic and vividly illustrated reference for all ages.

From the origin of life, through the age of dinosaurs stalked by the terrifying Tyrannosaurus rex, to the earliest humans, this book tells the story of life on Earth. Dinosaurs may be the stars of the show, but the book is truly comprehensive, with fossil plants, invertebrates, amphibians, fish, birds, reptiles, mammals, and even early bacteria conjuring up an entire past world. To put all of these extinct species in context, the book explores geological time and the way life-forms are classified. It also looks at how fossils preserve the story of evolution, and how it can be deciphered. The chapter on "Young Earth" explains how forces shaped Earth and steered the course of life. The main part of the book - "Life on Earth" - lays out and catalogues the rich story of life, from its beginnings 4 billion years ago, through each geological period, such as the Jurassic and Cretaceous, to the present. The stunning visuals and authoritative text make Dinosaurs and Prehistoric Life a fascinating and revealing encyclopedia that will appeal to the whole family.

"Convincing Ground" pulses with love of country. In this powerful, lyrical and passionate new work Bruce Pascoe asks us to fully acknowledge our past and the way those actions continue to influence our nation today, both physically and intellectually. The book resonates with ongoing debates about identity, dispossession, memory

and community. Pascoe draws on the past through a critical examination of major historical works and witness accounts and finds uncanny parallels between the techniques and language used there to today's national political stage. He has written the book for all Australians, as an antidote to the great Australian inability to deal respectfully with the nation's constructed Indigenous past. For Pascoe, the Australian character was not forged at Gallipoli, Eureka and the back of Bourke, but in the furnace of Murdering Flat, Convincing Ground and Werribee. He knows we can't reverse the past, but believes we can bring in our soul from the fog of delusion. Pascoe proposes a way forward, beyond shady intellectual argument and immature nationalism, with our strengths enhanced and our weaknesses acknowledged and addressed.
