What if you could live forever? Immortality comes with a price, you have to trade life with your lover. When Olivia becomes a volunteer at St. John's hospital for NODA (No One Dies Alone), her first patient is Viktor Erikson, an elderly man whose hand she is to hold until, hopefully, a family member arrives. In the last hours of his life, Viktor asks Olivia to read aloud the ancient leather-bound book he carries with him always, *The Ethics of Immortality*. As Olivia begins reading the story of Viktor and Morgana Erikson—who sail the seas, find adventure, and plan to live together forever—she assumes that it is a fictionalized account of her patient's ancestors. After all, how could the same Viktor be alive in

both 1839 and now in 2053? But the deeper Olivia delves into the story, the more she begins to question. Could this be the same Viktor? Is Morgana coming to save him? And did they really discover the water of life?

Biochemical, Physiological, & Molecular Aspects of Human Nutrition

Principles of Surgery

Designed for the use of critical care specialists, anaesthetists and surgeons, this text describes the general principles of fluid, electrolyte and acid base balance, followed by a discussion of the disturbance of balance in the critical care patient and in other specific abnormalities.

Nutrition for Sport and Exercise, Second Edition gives you a wealth of information and guidance to design effective nutrition programs for athletic clients and promote lifelong health through proper nutrition. This one-volume resource covers a broad range of topics in diet and exercise and ends the confusion about proper nutrition for active people of every age. This powerful guide, using new research, gives you the facts and strategies to assess athletes' nutritional requirements and to use diet to improve performance and enhance overall health.
