Kubla Khan

From the Arthur C. Clarke Award-winning Adrian Tchaikovsky, *The Doors of Eden* is an extraordinary feat of the imagination and a page-turning adventure about parallel universes and the monsters that they hide. They thought we were safe. They were wrong. Four years ago, two girls went looking for monsters on Bodmin Moor. Only one came back. Lee thought she'd lost Mal, but now she's miraculously returned. But what happened that day on the moors? And where has she been all this time? Mal's reappearance hasn't gone unnoticed by MI5 officers either, and Lee isn't the only one with questions. Julian Sabreur is investigating an attack on top physicist Kay Amal Khan. This leads Julian to clash with agents of an unknown power - and they may or may not be human. His only clue is grainy footage, showing a woman who supposedly died on Bodmin Moor. Dr Khan's research was theoretical; then she found cracks between our world and parallel Earths. Now these cracks are widening, revealing extraordinary creatures. And as the doors crash open, anything could come through. "Tchaikovsky weaves a masterful tale a suspenseful joyride through the multiverse." (Booklist)

Eden Mine

The enthralling new novel from the acclaimed author of *Fallen Land*, *The River of Kings*, and *Gods of Howl Mountain* Retired racehorse jockey and Vietnam veteran Anse Caulfield rescues exotic big cats, elephants, and other creatures for Little Eden, a wildlife sanctuary near the abandoned ruins of a failed development on the Georgia coast. But when Anse's prized lion escapes, he becomes obsessed with replacing her—even if the means of rescue aren't exactly legal. Anse is joined by Malaya, a former soldier who hunted rhino and elephant poachers in Africa; Lope, whose training in falconry taught him to pilot surveillance drones; and Tyler, a veterinarian who has found a place

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

in Anse's obsessive world. From the rhino wars of Africa to the battle for the Baghdad Zoo, from the edges of the Okefenokee Swamp to a remote private island off the Georgia coast, Anse and his team battle an underworld of smugglers, gamblers, breeders, trophy hunters, and others who exploit exotic game. *Pride of Eden* is Taylor Brown's brilliant fever dream of a novel: set on the eroding edge of civilization, rooted in dramatic events linked not only with each character's past, but to the prehistory of America, where great creatures roamed the continent and continue to inhabit our collective imagination.

River of Eden

In the Zohar, the jewel in the crown of Jewish mystical literature, the verse "A river flows from Eden to water the garden" (Genesis 2:10) symbolizes the river of divine plenty that unceasingly flows from the depths of divinity into the garden of reality. Hellner-Eshed's book investigates the flow of this river in the world of the Zoharic heroes, Rabbi Shimon bar Yohai and his disciples, as they embark upon their wondrous spiritual adventures. By focusing on the Zohar's language of mystical experience and its unique features, the author is able to provide remarkable scholarly insight into the mystical dimensions of the Zohar, namely the human quest for an enhanced experience of the living presence of the divine and the Zohar's great call to awaken human consciousness.

A River Ran Out of Eden

Chana Cox was a brilliant woman who lived a remarkable and incredibly full life until her passing in March 2019 at 76 years old. In her honor, her children have begun to re-publish memorial editions of her books. The first of these publications is this, her most popular book. *A River Went out of Eden* tells the engrossing stories of her life and those around her, in the beautiful but unforgiving, Idaho wilderness area. This memorial edition of the book includes never-before-published photographs and letters.

The Periodic Kingdom

In a brilliant synthesis of genetic, archaeological, linguistic and climatic data, Oppenheimer challenges current thinking with his claim that there was only one successful migration out of Africa. In 1988 Newsweek headlined the startling discovery that everyone alive on the earth today can trace their maternal DNA back to one woman who lived in Africa 150,000 years ago. It was thought that modern humans populated the world through a series of migratory waves from their African homeland. Now an even more radical view has emerged, that the members of just one group are the ancestors of all non-Africans now alive, and that this group crossed the mouth of the Red Sea a mere

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

85,000 years ago. It means that not only is every person on the planet descended from one African 'Eve' but every non-African is related to a more recent Eve, from that original migratory group. This is a revolutionary new theory about our origins that is both scholarly and entertaining, a remarkable account of the kinship of all humans. Further details of the findings in this book are presented at www.bradshawfoundation.com/stephenoppenheimer/

Life of Heber C. Kimball

Barlow has woven selections from the writings of biologists and philosophers into a unified whole which explores a range of viewpoints on evolutionary biology.

The Four Rivers of Eden

Sanchez Travers seemed more scoundrel than scientist, but Dr. Annie Parrish needs the help of the Harvard-educated ethnobiologist to head up the Amazon in search of an extraordinary discovery.

Outer Dark

Outer Dark is a novel at once fabular and starkly evocative, set in an unspecified place in Appalachia, sometime around the turn of the century. A woman bears her brother's child, a boy; he leaves the baby in the woods and tells her he died of natural causes. Discovering her brother's lie, she sets forth alone to find her son. Both brother and sister wander separately through a countryside being scourged by three terrifying and elusive strangers, headlong toward an eerie, apocalyptic resolution.

The Garden of Eden

On a night of torrential rain, a warrior appears near the Columbia River, where the Chinook people thrived before the hydroelectric dams came and changed their entire way of life. He has come to reclaim the river, to return it to its original majesty. Soon after, government employees are found murdered with elaborate harpoons. As the body count grows, Francine Smohalla, a government marine biologist of Chinook and white descent, embarks on her own investigation of the bizarre murders. As she desperately tries to find the killer and prevent any other murders, she finds herself spinning in the convergence of ethnic hatreds between Indians and whites, an unlikely relationship with a kindred spirit whose troubled life has led him to contemplate terrorism and apocalypse, an ancient prophecy about the return of her beloved salmon, and the giant dams on the Columbia that loom large and as seemingly immovable as the mountains themselves. A River Out of Eden is a gripping literary thriller straight from today's headlines set against the uniquely American contradictions of

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

the Pacific Northwest.

The New Answers Book

A 'travel guide' to the periodic table, explaining the history, geography and the rules of behaviour in this imagined land. The Periodic Kingdom is a journey of imagination in which Peter Atkins treats the periodic table of elements - the 109 chemical elements in the world, from which everything is made - as a country, a periodic kingdom, each region of which corresponds to an element. Arranged much like a travel guide, the book introduces the reader to the general features of the table, the history of the elements, and the underlying arrangement of the table in terms of the structure and properties of atoms. Atkins sees elements as finely balanced living personalities, with quirks of character and certain, not always outward, dispositions, and the kingdom is thus a land of intellectual satisfaction and infinite delight.

The Blind Watchmaker

A wise and witty compendium of the greatest thoughts, greatest minds, and greatest books of all time -- listed in accessible and succinct form -- by one of the world's greatest scholars. From the "Hundred Best Books" to the "Ten Greatest Thinkers" to the "Ten Greatest Poets," here is a concise collection of the world's most significant knowledge. For the better part of a century, Will Durant dwelled upon -- and wrote about -- the most significant eras, individuals, and achievements of human history. His selections have finally been brought together in a single, compact volume. Durant eloquently defends his choices of the greatest minds and ideas, but he also stimulates readers into forming their own opinions, encouraging them to shed their surroundings and biases and enter "The Country of the Mind," a timeless realm where the heroes of our species dwell. From a thinker who always chose to exalt the positive in the human species, *The Greatest Minds and Ideas of All Time* stays true to Durant's optimism. This is a book containing the absolute best of our heritage, passed on for the benefit of future generations. Filled with Durant's renowned wit, knowledge, and unique ability to explain events and ideas in simple and exciting terms, this is a pocket-size liberal arts and humanist curriculum in one volume.

The Selfish Gene

A "certainly weird . . . strangely wonderful . . . [and] often irresistible" search to find the real Garden of Eden (The New York Times Book Review). Where, precisely, was God's Paradise? St. Augustine had a theory. So did medieval monks, John Calvin and Christopher Columbus. But when Darwin's theory of evolution changed our understanding of human origins, shouldn't the desire to put a

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

literal Eden on the map have faded away? Not so fast. This "gloriously researched, pluckily written historical and anecdotal assay of humankind's age-old quixotic quest for the exact location of the Biblical garden" (Elle) explores an obsession that has consumed scientists and theologians alike for centuries. To this day, the search continues, taken up by amateur explorers, clergymen, scholars, engineers and educators—romantic seekers all who started with the same simple-sounding Bible verses, only to end up at a different spot on the globe: Sri Lanka, the Seychelles, the North Pole, Mesopotamia, China, Iraq—and Ohio. Inspired by an Eden seeker in her own family, "Wilensky-Lanford approaches her subjects with respect, enthusiasm and conscientious research" (San Francisco Chronicle) as she traverses a century-spanning history provoking surprising insights into where we came from, what we did wrong, and where we go from here. And it all makes for "a lively journey" (Kirkus Reviews).

Climbing Mount Improbable

Boldly go where few have gone before! Endorsed by the World Wildlife Fund. Features 26 colour and black-and-white photographs and maps. "The Power of the Barren Lands may be beyond words but you won't come any closer than those on the following pages!" —MONTE HUMMEL West of Hudson Bay in Canada's north, an enormous triangle, twice the size of Alberta or Texas, forms the largest chunk of wilderness left on the continent. The word "tundra" may conjure up an image of a desolate, treeless plain, but this mainland portion of the Canadian arctic is far from featureless. The area is home to millions of geese and other birds, and is the haunt of some of the world's last, great migratory herds of large herbivores and the predators that follow them. Discovering Eden is a collection of stories, essays and commentaries about the author's life in the remote wilderness and his hopes and dreams for its future. It is about the land and the animals that live there, and what they have taught the author. Throughout the book the author tries to explain, within the limitations of language, the lure of the Barren Lands and why this place became for him a personal Eden. The book also recounts adventures—a personal, inner one for the author, and the thrill of canoeing this untouched wilderness for those who travel with him on his tours. (September 2003)

Calumet Beginnings

In Eden Mine, the award-winning author of Black River examines the aftershocks of an act of domestic terrorism rooted in a small Montana town on the brink of abandonment, as it tears apart a family, tests the faith of a pastor and the loyalty of a sister, and mines the deep rifts that come when the reach of the government clashes with individual freedom Jo Faber is packing up the home she and her brother Samuel inherited. For generations, the Fabers have lived near Eden Mine, but Jo and Samuel will be the last. Their family home has been seized by the state through eminent domain. At the moment she hears

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

the news of the bombing on the radio, Jo knows nothing, but she also knows that something isn't right. The arrival of their friend and unofficial guardian, Sheriff Hawkins, confirms her suspicions. Samuel said he was going to find work. But soon it's clear that he's not gone, but missing—last seen by a security camera near the district courthouse at Elk Fork. And a nine-year-old girl, the daughter of a pastor of a storefront church, is in critical condition. This isn't the first time Jo and Samuel have seen the ravages of violence visit their family. Last time, they lost their mother and Jo lost her ability to walk. Samuel took care of her, outfitted their barn with special rigging so she could keep riding their mule. But he was never the same, falling in with a separatist group, getting a tattoo he'd flaunt, then spending years hiding. She thought he had finished with all that. But now he's missing, and she can't talk to the one person she trusts. A timely story of the anger and disaffection tearing apart many communities in this country, S.M. Hulse's *Eden Mine* is also a beautiful novel of the West, of a deep love for the land, of faith in the face of evil, and of the terrible choices we make for the ones we love.

A River Flows from Eden

Ray and Alexa were on a journey to Avalon in the Alpha Centauri System when their star cruiser was taken over by an unknown force. As they were responding to the emergency, they instantaneously found themselves transported to the bank of a crystal clear, blue-water river in a Paradise-like setting. Next their incredible kidnapper was revealed. What follows is a challenging call to an unexpected destiny and a spiritual journey of growth and adventure like none you've ever read before.

The Ancestor's Tale

The renowned biologist and thinker Richard Dawkins presents his most expansive work yet: a comprehensive look at evolution, ranging from the latest developments in the field to his own provocative views. Loosely based on the form of Chaucer's *Canterbury Tales*, Dawkins's *Tale* takes us modern humans back through four billion years of life on our planet. As the pilgrimage progresses, we join with other organisms at the forty "rendezvous points" where we find a common ancestor. The band of pilgrims swells into a vast crowd as we join first with other primates, then with other mammals, and so on back to the first primordial organism. Dawkins's brilliant, inventive approach allows us to view the connections between ourselves and all other life in a bracingly novel way. It also lets him shed bright new light on the most compelling aspects of evolutionary history and theory: sexual selection, speciation, convergent evolution, extinction, genetics, plate tectonics, geographical dispersal, and more. *The Ancestor's Tale* is at once a far-reaching survey of the latest, best thinking on biology and a fascinating history of life on Earth. Here Dawkins shows

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

us how remarkable we are, how astonishing our history, and how intimate our relationship with the rest of the living world.

Studies in Armenian Art

Paradise Lust

In this changing world of what is deemed socially and politically "correct," polygamy is perhaps the last great taboo. Over the course of the last thousand years, monogamy - at least in name - has been the default setting for coupledness and procreation. And yet, throughout history, there have been inklings that "one-man, one-woman" may not be the most natural state-of-being for humans. The recent Ashley Madison "cheaters website" hacking, coupled with the high divorce rate of the last half-century, provide more than enough evidence to convince even a hopeless romantic that monogamy, and the institution of marriage which props it up, is doomed to be a bygone remnant of a more socially conservative past. Esteemed writer and evolutionary biologist David P. Barash tackles this uncomfortable finding: that humans are actually biologically and anthropologically more inclined toward polygamy. With years of research in the field to back up this argument, Barash presents hundreds of anecdotes from both evolutionary biology and human history that guide the reader through the societal impacts of monogamy and polygamy - some expected (sexual behavior) and others unexpected (the most successful models of parenting). Despite this natural inclination of humanity, Barash is reassuring throughout this fascinating read in his resolution that "biology is not destiny."

A Devil's Chaplain

Biblical answers to twenty-five of today's most relevant questions.

The Biotic Message

An ethologist shows man to be a gene machine whose world is one of savage competition and deceit

Journal of a Novel

Though left uncompleted, "Kubla Khan" is one of the most famous examples of Romantic era poetry. In it, Samuel Coleridge provides a stunning and detailed example of the power of the poet's imagination through his whimsical description of Xanadu, the capital city of Kublai Khan's empire. Samuel Coleridge penned "Kubla Khan" after waking up from an opium-induced dream in which he experienced and imagined the realities of the great Mongol ruler's capital city. Coleridge began writing what he remembered of his dream immediately upon waking from it, and intended to write two to three hundred lines.

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

However, Coleridge was interrupted soon after and, his memory of the dream dimming, was ultimately unable to complete the poem.

HarperPerennial Classics brings great works of literature to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. Look for more titles in the HarperPerennial Classics collection to build your digital library.

Pride of Eden

Irrigation came to the arid West in a wave of optimism about the power of water to make the desert bloom. Mark Fiege's fascinating and innovative study of irrigation in southern Idaho's Snake River valley describes a complex interplay of human and natural systems. Using vast quantities of labor, irrigators built dams, excavated canals, laid out farms, and brought millions of acres into cultivation. But at each step, nature rebounded and compromised the intended agricultural order. The result was a new and richly textured landscape made of layer upon layer of technology and intractable natural forces—one that engineers and farmers did not control with the precision they had anticipated. Irrigated Eden vividly portrays how human actions inadvertently helped to create a strange and sometimes baffling ecology. Winner of the Idaho Library Association Book Award, 1999 Winner of the Charles A. Weyerhaeuser Award, Forest History Society, 1999-2000

River Out of Eden

The noted research psychiatrist and New York Times–bestselling author explores how Transcendental Meditation permanently alters your daily consciousness, resulting in greater productivity, emotional resilience, and aptitude for success. Most of us believe that we live in only three states of consciousness: wakefulness, sleep, and dreaming. But there is so much more. In *Super Mind*, clinical psychiatrist and bestselling author Norman E. Rosenthal, M.D., shows how the incredibly simple daily practice of Transcendental Meditation (TM) can permanently improve your state of mind during the routine hours of waking life—placing you into a super-mind state of consciousness where you consistently perform at peak aptitude. In his most ambitious and practical book yet, Rosenthal shows how TM is more than a tool for destressing or for general wellness. It is a gateway to functioning physically, emotionally, and intellectually at levels we never knew we could attain. Written in Rosenthal's trademark style of restraint and intellectual carefulness, *Super Mind* explores how we can aspire to so much more than we ever thought possible. From the Hardcover edition.

East of Eden

Super Mind

A provocative new interpretation of the Adam and Eve story from an expert in Biblical literature. The Garden of Eden story, one of the most famous narratives in Western history, is typically read as an ancient account of original sin and humanity's fall from divine grace. In this highly innovative study, Ziony Zevit argues that this is not how ancient Israelites understood the early biblical text. Drawing on such diverse disciplines as biblical studies, geography, archaeology, mythology, anthropology, biology, poetics, law, linguistics, and literary theory, he clarifies the worldview of the ancient Israelite readers during the First Temple period and elucidates what the story likely meant in its original context. Most provocatively, he contends that our ideas about original sin are based upon misconceptions originating in the Second Temple period under the influence of Hellenism. He shows how, for ancient Israelites, the story was really about how humans achieved ethical discernment. He argues further that Adam was not made from dust and that Eve was not made from Adam's rib. His study unsettles much of what has been taken for granted about the story for more than two millennia—and has far-reaching implications for both literary and theological interpreters. "Classical Hebrew in the hands of Ziony Zevit is like a cello in the hands of a master cellist. He knows all the hidden subtleties of the instrument, and he makes you hear them in this rendition of the profoundly simple story of Adam, Eve, the Serpent, and their Creator in the Garden of Eden. Zevit brings a great deal of other biblical learning to bear in a surprisingly light-hearted book."—Jack Miles, author of *God: A Biography*

What Really Happened in the Garden of Eden?

How did the replication bomb we call "life" begin and where in the world, or rather, in the universe, is it heading? Writing with characteristic wit and an ability to clarify complex phenomena (the *New York Times* described his style as "the sort of science writing that makes the reader feel like a genius"), Richard Dawkins confronts this ancient mystery.

Out of Eden

Essays on morality, mortality, and much more from the *New York Times*–bestselling author of *The Selfish Gene* and *The God Delusion*. This early collection of essays from renowned evolutionary biologist Richard Dawkins is an enthusiastic declaration, a testament to the power of rigorous scientific examination to reveal the wonders of the world. In these essays, Dawkins revisits the meme, the unit of cultural information that he named and wrote about in his groundbreaking work, *The Selfish Gene*. Here also are moving tributes to friends and colleagues, including a eulogy for novelist Douglas

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

Adams, author of *The Hitchhiker's Guide to the Galaxy*; correspondence with fellow biologist Stephen Jay Gould; commentary on the events of 9/11; and visits with the famed paleoanthropologists Richard and Meave Leakey at their African wildlife preserve. Ending with a vivid note to Dawkins's ten-year-old daughter, reminding her to remain curious, ask questions, and live the examined life, *A Devil's Chaplain* is a fascinating read by "a man of firm opinions, which he expresses with clarity and punch" (*Scientific American*).

The Doors of Eden

NOW A LIFETIME TV MOVIE STARRING JOHN STAMOS From the bestselling author of *The Double Bind*, *Midwives*, and *Skeletons at the Feast* comes a novel of shattered faith, intimate secrets, and the delicate nature of sacrifice. "There," says Alice Hayward to Reverend Stephen Drew, just after her baptism, and just before going home to the husband who will kill her that evening and then shoot himself. Drew, tortured by the cryptic finality of that short utterance, feels his faith in God slipping away and is saved from despair only by a meeting with Heather Laurent, the author of wildly successful, inspirational books about . . . angels. Heather survived a childhood that culminated in her own parents' murder-suicide, so she identifies deeply with Alice's daughter, Katie, offering herself as a mentor to the girl and a shoulder for Stephen - who flees the pulpit to be with Heather and see if there is anything to be salvaged from the spiritual wreckage around him. But then the State's Attorney begins to suspect that Alice's husband may not have killed himself. . .and finds out that Alice had secrets only her minister knew. *Secrets of Eden* is both a haunting literary thriller and a deeply evocative testament to the inner complexities that mark all of our lives. Once again Chris Bohjalian has given us a riveting page-turner in which nothing is precisely what it seems. As one character remarks, "Believe no one. Trust no one. Assume all of our stories are suspect."

Dragons of Eden

"A history of the human brain from the big bang, fifteen billion years ago, to the day before yesterday . . . It's a delight."—The New York Times Dr. Carl Sagan takes us on a great reading adventure, offering his vivid and startling insight into the brain of man and beast, the origin of human intelligence, the function of our most haunting legends—and their amazing links to recent discoveries. "How can I persuade every intelligent person to read this important and elegant book? . . . He talks about all kinds of things: the why of the pain of human childbirth . . . the reason for sleeping and dreaming . . . chimpanzees taught to communicate in deaf and dumb language . . . the definition of death . . . cloning . . . computers . . . intelligent life on other planets. . . Fascinating . . . delightful."—The Boston Globe "In some lost Eden where dragons ruled, the foundations of our intelligence were laid. . . Carl Sagan takes us on a guided tour of

that lost land. . . . Fascinating . . . entertaining . . . masterful."—St. Louis Post-Dispatch

Discovering Eden

This story of the creation of the Calumet Area emphasizes the relationship between the physical geography of the area and the settlement patterns that developed there

Outgrowing God

A masterpiece of Biblical scope, and the magnum opus of one of America's most enduring authors, in a commemorative hardcover edition In his journal, Nobel Prize winner John Steinbeck called East of Eden "the first book," and indeed it has the primordial power and simplicity of myth. Set in the rich farmland of California's Salinas Valley, this sprawling and often brutal novel follows the intertwined destinies of two families—the Trasks and the Hamiltons—whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. The masterpiece of Steinbeck's later years, East of Eden is a work in which Steinbeck created his most mesmerizing characters and explored his most enduring themes: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Adapted for the 1955 film directed by Elia Kazan introducing James Dean, and read by thousands as the book that brought Oprah's Book Club back, East of Eden has remained vitally present in American culture for over half a century.

Evolution Extended

A brilliant book celebrating improbability as the engine that drives life, by the acclaimed author of *The Selfish Gene* and *The Blind Watchmaker*. The human eye is so complex and works so precisely that surely, one might believe, its current shape and function must be the product of design. How could such an intricate object have come about by chance? Tackling this subject—in writing that the *New York Times* called "a masterpiece"—Richard Dawkins builds a carefully reasoned and lovingly illustrated argument for evolutionary adaptation as the mechanism for life on earth. The metaphor of Mount Improbable represents the combination of perfection and improbability that is epitomized in the seemingly "designed" complexity of living things. Dawkins skillfully guides the reader on a breathtaking journey through the mountain's passes and up its many peaks to demonstrate that following the improbable path to perfection takes time. Evocative illustrations accompany Dawkins's eloquent descriptions of extraordinary adaptations such as the teeming populations of figs, the intricate silken world of spiders, and the evolution of wings on the bodies of flightless animals. And through it all runs the thread of DNA, the molecule of life, responsible for its own destiny on an

Download Ebook River Out Of Eden A Darwinian View Of Life Science Masters Series

unending pilgrimage through time. Climbing Mount Improbable is a book of great impact and skill, written by the most prominent Darwinian of our age.

A Farewell to Arms

One of the world's bestselling science communicators, Dawkins gives readers an opportunity to rethink the big questions. In 12 fiercely funny, mind-expanding chapters, he explains how the natural world arose without a designer--the improbability and beauty of the "bottom-up programming" that engineers an embryo or a flock of starlings--and challenges head-on some of the most basic assumptions made by the world's religions.

The Greatest Minds and Ideas of All Time

Tucked in a bend of the Trinity River a few minutes from downtown Fort Worth, the Garden of Eden neighborhood has endured for well over a century as a homeplace for freed African American slaves and their descendants. Among the earliest inhabitants in the Garden, Major and Malinda Cheney assembled over 200 acres of productive farmland on which they raised crops and cattle, built a substantial home for their children, and weathered a series of family crises that ranged from a false accusation of rape and attempted lynching to the murder of their eldest son. Major and Malinda Cheney's great-great-grandson, Drew Sanders, recounts engaging tales of the family's life against the backdrop of Fort Worth and Tarrant County history--among them stories about the famous family Sunday dinners (recipes included). Though some family members, including writer Bob Ray Sanders and transplant specialist Dollie Gentry, no longer live in this special place, life in the Garden of Eden still shapes the family's character and binds them to the homeplace.

A River Out of Eden

Nira Stone (1938-2013) contributed to the understanding of mediaeval Armenian art and painting. Her interest ranged over a millennium of artistic expression, and over such fields of creativity as manuscript painting, frescos, and mosaics. The volume contains her published papers and one made newly public.

Out of Eden: The Peopling of the World

Patiently and lucidly, this Los Angeles Times Book Award and Royal Society of Literature Heinemann Prize winner identifies the aspects of the theory of evolution that people find hard to believe and removes the barriers to credibility one by one. "As readable and vigorous a defense of Darwinism as has been published since 1859".--The Economist.

Irrigated Eden

Each working day from January 29 to November 1, 1951, John Steinbeck warmed up to the work of writing *East of Eden* with a letter to the late Pascal Covici, his friend and editor at The Viking Press. It was his way, he said, of "getting my mental arm in shape to pitch a good game." Steinbeck's letters were written on the left-hand pages of a notebook in which the facing pages would be filled with the text of *East of Eden*. They touched on many subjects—story arguments, trial flights of workmanship, concern for his sons. Part autobiography, part writer's workshop, these letters offer an illuminating perspective on Steinbeck's creative process, and a fascinating glimpse of Steinbeck, the private man.

Mother of Eden

Featuring a previously published author introduction, a personal foreword by his son and a new introduction by his grandson, a definitive edition of the lauded World War I classic collects all 39 of the Nobel Prize-winning author's alternate endings to offer new insights into his creative process. Reprint.

Secrets of Eden

"We speak of a mother's love, but we forget her power." Civilization has come to the alien, sunless planet its inhabitants call Eden. Just a few generations ago, the planet's five hundred inhabitants huddled together in the light and warmth of the Forest's lantern trees, afraid to venture out into the cold darkness around them. Now, humanity has spread across Eden, and two kingdoms have emerged. Both are sustained by violence and dominated by men - and both claim to be the favored children of Gela, the woman who came to Eden long ago on a boat that could cross the stars, and became the mother of them all. When young Starlight Brooking meets a handsome and powerful man from across Worldpool, she believes he will offer an outlet for her ambition and energy. But she has no inkling that she will become a stand-in for Gela herself, and wear Gela's fabled ring on her own finger—or that in this role, powerful and powerless all at once, she will try to change the course of Eden's history.
