True Scots should have more philosophy than to imitate unenlightened patriotisms that would interrupt a natural process defined by Herbert Spencer as change from an incoherent homogeneity to a coherent heterogeneity accompanied by the dissipation of motion and the integration of matter. So Penelope peoples, in their darkness, undo the work of civilising daylight. Let Bohemia rage and the states of the Balkans imagine vain things. But why should Scotland waste time and electric light on looking back too fondly to the things that are behind, while she cannot help pressing forward to the inevitable destiny before her? With the warning of Ireland at hand, some of us

cry out for Home Rule and such-like retrogressions that might go to giving back, at one end of the United Kingdom, the shadow of its cloudy dignity along with the substance of its old discords. Where is this reactionary Particularismus to stop? There are parts of Caledonia which, in its stern and wild times, were independent of each other, some that still are as different from one another in blood and speech, as most of Scotland is from England. Shall Badenoch or Buchan awake its overlaid individuality? May not Galloway and Strathclyde set up for recognition of their ex-independence? Then why not encourage Strathbogie, the Cumbraes, the Braes of Bonny Doon, or the parish of Gandercleugh, to lament upon the fate that has made them members of one greater body? Nay, now that the clans are broken up, could they not contrive to respin their warp of local loyalty, crossing the woof of national patriotism? Such reductio ad absurdum is worth thinking about, when at this moment there are signs of relapse in the long convalescence from that Jacobite fever that "carried" hard heads as well as soft hearts, and set old grudges against the Union flaunting in plaid and philibeg.

Panicked, she flees into the woods and right into the arms of a very surprised British soldier--the man from the painting. \*\*\*\* August Bancroft has no idea that the woman he saved from the American Rebels is from the future, or that the man who traveled through time with her is not their friend. All he knows is that he feels compelled to protect her, even if it means sacrificing his honor in the end. Torn by the political leanings of the time and his own personal beliefs, August struggles to find what freedom means for him. Threats lurk close by, though, and there is no time to argue when danger reveals itself.

From the first vistas provided by flight in balloons in the eighteenth century to the most recent sensing operations performed by military drones, the history of aerial imagery has marked the transformation of how people perceived their world, better understood their past, and imagined their future. In *Aerial Aftermaths* Caren Kaplan traces this cultural history, showing how aerial views operate as a form of world-making tied to the times and places of war. Kaplan's investigation of the aerial arts of war—painting, photography, and digital imaging—range from England's surveys of Scotland following the defeat of the 1746 Jacobite rebellion and early twentieth-century photographic mapping of Iraq to images taken in the immediate aftermath of 9/11. Throughout, Kaplan foregrounds aerial imagery's importance to modern visual culture and its ability to enforce colonial power, demonstrating both the destructive force and the potential for political connection that come with viewing from above.
