## The World's Most Dangerous Animals SUBTITLE:

### Mosquitoes of the World

Lists the dangerous animals of the world by continent, providing key facts about their lifespan, diet, physical characteristics, habitats, and why each animal is considered dangerous.

## **Fairy Dust and the Quest for the Egg**

Dare to discover the world's most ferocious creatures and uncover the deadliest of facts. How does the slender deep-sea gulper swallow prey twice its size? Who sprays acid-filled blood from their eyes? Who sucks out bodily fluids with its mouthparts? It's all you ever wanted to know . . . and a lot more you'll wish you didn't!

## **Hidden Dangers**

The spirit that founded the volume and guided its development is radically inter- and transdisciplinary. Dispatches have arrived from anthropology, communications, English, film studies (including theory, history, criticism), literary studies (including theory, history, criticism), media and screen studies, cognitive cultural studies, narratology, philosophy, poetics, politics, and political theory; and as a special aspect of the volume, theorist-filmmakers make their thoughts known as well. Consequently, the critical reflections gathered here are decidedly pluralistic and heterogeneous, inviting—not bracketing or partitioning—the dynamism and diversity of the arts, humanities, social sciences, and even natural sciences (in so far as we are biological beings who are trying to track our cognitive and perceptual understanding of a nonbiological thing—namely, film, whether celluloid-based or in digital form); these disciplines, so habitually cordoned off from one another, are brought together into a shared conversation about a common object and domain of investigation. This book will be of interest to theorists and practitioners of nonfiction film; to emerging and established scholars contributing to the secondary literature; and to those who are intrigued by the kinds of questions and claims that

# Free Reading The Most Dangerous Animal

seem native to nonfiction film, and who may wish to explore some critical responses to them written in engaging language.

**\*\*The instant New York Times bestseller.\*\*** **\*An international bestseller.\*** “Hugely impressive, a major work.”—NPR A pioneering and groundbreaking work of narrative nonfiction that offers a dramatic new perspective on the history of humankind, showing how through millennia, the mosquito has been the single most powerful force in determining humanity’s fate Why was gin and tonic the cocktail of choice for British colonists in India and Africa? What does Starbucks have to thank for its global domination? What has protected the lives of popes for millennia? Why did Scotland surrender its sovereignty to England? What was George Washington's secret weapon during the American Revolution? The answer to all these questions, and many more, is the mosquito. Across our planet since the dawn of humankind, this nefarious pest, roughly the size and weight of a grape seed, has been at the frontlines of history as the grim reaper, the harvester of human populations, and the ultimate agent of historical change. As the mosquito transformed the landscapes of civilization, humans were unwittingly required to respond to its piercing impact and universal projection of power. The mosquito has determined the fates of empires and nations, razed and crippled economies, and decided the outcome of pivotal wars, killing nearly half of humanity along the way. She (only females bite) has dispatched an estimated 52 billion people from a total of 108 billion throughout our relatively brief existence. As the greatest purveyor of extermination we have ever known, she has played a greater role in shaping our human story than any other living thing

Introduces some of the most dangerous animals on Earth, describing the physical characteristics and behavior that makes them deadly, including such creatures as saltwater crocodiles, poison dart frogs, box jellyfish, and scorpions.

### 64 Questions & Answers About Dangerous Animals

Robert Graysmith reveals the true identity of Zodiac—America's most elusive serial killer. Between December 1968 and October 1969 a hooded serial killer called Zodiac terrorized San Francisco. Claiming responsibility for thirty-seven murders, he manipulated the media with warnings, dares, and bizarre cryptograms that baffled FBI code-breakers. Then as suddenly as the murders began, Zodiac disappeared into the Bay Area fog. After painstaking investigation and more than thirty years of research, Robert Graysmith finally exposes Zodiac's true identity. With overwhelming evidence he reveals the twisted private life that led to the crimes, and provides startling theories as to why they stopped. America's greatest unsolved mystery has finally been solved. INCLUDES PHOTOS AND A COMPLETE REPRODUCTION OF ZODIAC'S LETTERS

### **The Most Dangerous Game**

New York Times Bestseller Soon after his birthmother

## Free Reading The Most Dangerous Animal

contacted him for the first time at the age of thirty-nine, adoptee Gary L. Stewart decided to search for his biological father. His quest would lead him to a horrifying truth and force him to reconsider everything he thought he knew about himself and his world. Written with award-winning author and journalist Susan Mustafa, *The Most Dangerous Animal of All* tells the story of Stewart's decade-long hunt. While combing through government records and news reports and tracking down relatives and friends, Stewart turns up a host of clues—including forensic evidence—that conclusively identify his father as the Zodiac Killer, one of the most notorious and elusive serial murderers in history. For decades, the Zodiac Killer has captivated America's imagination. His ability to evade capture while taunting authorities made him infamous. The vicious specificity of his crimes terrified Californians before the Manson murders and after, and shocked a culture enamored with the ideals of the dawning Age of Aquarius. To this day, his ciphers have baffled detectives and amateur sleuths, and his identity remains one of the twentieth century's great unsolved mysteries. *The Most Dangerous Animal of All* reveals the name of the Zodiac for the very first time. Mustafa and Stewart construct a chilling psychological profile of Stewart's father: as a boy with disturbing fixations, a frustrated intellectual with pretensions to high culture, and an inappropriate suitor and then jilted lover unable to process his rage. At last, all the questions that have surrounded the case for almost fifty years are answered in this riveting narrative. The result is a singular work of true crime at its finest—a compelling, unbelievable true story told with the pacing of a page-turning novel—as well as a sensational and powerful memoir.

### **National Geographic Readers: Deadliest Animals**

## Free Reading The Most Dangerous Animal

These 13 deadly creatures can be difficult to spot until you're right on top of them . . . or they're right on top of you. Look for each animal in its environment—look closely!—and learn all the ways you could perish—or survive—depending on how smart, well-informed, and good at running away you are. From the deathstalker scorpion and the poison dart frog to wasps, alligators, and many more, young readers will gain a new appreciation for the animal kingdom, and the dangers it hides in plain sight!

and behavior of the box jellyfish.

## **Dangerous Animals**

A story of the most dangerous animals in the world competing in the Most Dangerous Animal of All Contest, including a shark, a tiger, and a mosquito.

## **Box Jellyfish**

From one of America's most popular short story writers and an Academy Award nominee: the O. Henry Award–winning tale that inspired the movie *The Hunt*. A subject of mysterious rumors and superstition, the deserted Caribbean Island was shrouded in an air of peril. To Sanger Rainsford, who fell off a yacht and washed up on its shores, the abandoned isle was a welcome paradise. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more dangerous than any he had ever encountered: a human. First published in 1924, this suspenseful tale “has inspired serial killers, films and stirred controversy in schools. A century on, the story continues to thrill” (*The Telegraph*). “[A] tense, relentless story of man-against-man adventure, in which the hunter Sanger Rainsford learns, at the hands of General Zaroff, what it means to be hunted.” —*Criterion*

## **The Deadliest Animals on Earth**

From venomous snakes to great white sharks to poison arrow frogs. Everything you need to know about animals that bite, sting, chomp and poison. Learn about - How to understand the "LD50" test that measures venom potency Why the world's most venomous creature isn't a snake, spider or

## Free Reading The Most Dangerous Animal

jellyfish How the Komodo dragon is able to kill prey with one bite (Hint - it's not just its poor oral hygiene) Whether the Sydney Funnel-Web or the Brazilian Wandering Spider is the world's deadliest. Oh, and don't forget the Six-Eyed Sand Spider How the world's most venomous snake has never killed anyone, yet a much less potent snake kills tens of thousands of people every year. And even this doesn't come close to the creature that kills more than a million people each and every year. This is not another serious encyclopedic reference to deadly animals (there are enough of those already!). Peter Elliott and his team of lowly paid researchers have spent months trawling through research papers and expert interviews to distill everything down to the most interesting and entertaining facts. Peter has spent almost every waking hour researching the animals in this books, to the extent that his dreams are now filled with Funnel-Web Spiders and a recurring nightmare where he is a Cape Fur Seal swimming in False Bay of the South African coast (This may be due to the fact that the author has a body fat percentage roughly approximating an adult seal). While Peter wakes up in a cold sweat each night, sure that Funnel-Web spiderlings have made a nest in his mouth while he slept, you can profit from his suffering with the most entertaining book on dangerous animals you are likely to read. The book covers only the most interesting and toxic snakes, spiders, scorpions, sharks, crocodiles, lizards and the dizzying array of things that will kill you if you dare to go into the water off Australia. Plus a clear explanation of the LD50 system for measuring how potent a particular venom is.
